

May 17, 2007

Dear Amerige Heights Resident,

I am pleased to announce that Greenfield Communications, your high-speed Internet provider, has completed an upgrade to our fiber optic infrastructure and is now providing faster Internet speeds to all Amerige Heights residents.

Each household at Amerige Heights is now able to download at speeds of up to 7.0 megabits per second, and upload at speeds of up to 3.0 megabits per second*. This is more than 5 times faster than average DSL speeds at no additional cost to you! The increase in Internet speeds has already been integrated, and you will not have to reset your current network or computer to obtain the faster speeds.

Along with faster speeds, other items provided to you at no additional charge include:

Local Community Intranet

24/7 Customer Support

10 E-mail Accounts

No Throughput Traffic Limit

50 Mb of E-mail Storage

Your Amerige Heights Community Intranet is available at www.amerigeheights.org. This site is updated regularly by your Homeowners Association Board with new news and events. Feel free to contact your HOA if you would like to add a message to the Intranet website.

Besides providing you the fastest Internet connection speeds, we also want to provide you with the best customer service possible. Greenfield technicians are on call Monday to Friday from 8AM to 5PM with off-hours available upon request. Our 24/7 toll-free customer service number is (888) 230-0020 if you have any problems or questions regarding your fiber optic high-speed data service.

Sincerely,

A handwritten signature in black ink that reads "M. Powers".

Mike Powers

President

Greenfield Communications, Inc.

*Actual download and upload speeds will vary based on numerous factors, such as the condition of wiring at your location, computer configuration, Internet and network congestion, and the speed of website servers you access, among other factors.
